

ANTARI S-100 SNOW MACHINE

The original S-100 snow machine, the S-100 is a powerful, high-pressure, large-output machine that produces abundant amounts of "snow". Owing to the built-in blower, the effect can be spread over considerable distances. The hanging bracket allows the snow machine to be placed over a crowd or above a set to simulate falling snow. The durable motor is cradled on rubber cushions within the case allowing for high output and low vibration. The SC-1 remote control gives 100% control over both area coverage and volume of snow produced. The S-100 Is Manual and has NO DMX on board, This light, portable machine is perfect for club effects, movie sets and stage settings so let it snow, let it snow, let it snow.

creates a foam/snow build up, which dissolves gradually

- The dissolution of the "blanket of snow" happens nearly without residues
- Snow output is controlled via the control unit at the remote control
- 10m Extention EXT4 included
- High output
- 5 liter tank capacity
- Reduced noise and vibrations
- Achieves incredible distance
- Hanging Bracket Included

Power: AC100V/AC120V
